

# School Sign Up

Signing up a school allows it to be included in a database where 50% of an online contribution of \$100 or more can be set aside to create a Professor Know How Lab fund for the school the donor wishes to support. A one time \$200 minimum contribution is required to create and manage the campaign. A sign up kit will be mailed to your address that includes everything you will need to get started.

A donation today can help TLC allocate resources immediately to start the process of getting Professor Know-How's Lab started at your school.

Would you consider being TLC's liaison to the school?  Yes  No

Thank you for making the effort to get the Professor Know How Lab into the school you selected. Charter and private schools have a great deal more autonomy in making decisions and are usually easier to get the program under way. Public schools usually require a presentation to, and the approval of, the local school board. For public schools, the process may take more time and require a lobbying effort with individual school board members. School boards sometimes choose to begin a new program as a trial at one or two schools. In those instances, TLC will do its best to persuade the board to include the school you selected in any trial program.

Please remember that getting approval from a school is just one of (3) steps involved in establishing the Professor Know How Lab. Raising the funds locally to fund the program and assembling a group of volunteers to become adjunct professors and assistants completes the list. In this day of social media, getting the word out can produce amazing results. So please, use whatever tools you have at your disposal to assist in getting the program started quickly. The school you have suggested is very fortunate to have you as a friend. You are indeed a kindred spirit. Thank you.
